Other Products for EOD, Special Forces, and Security

ICM FLATSCAN™ PORTABLE X-RAY

The Teledyne ICM FS30 is a wired or wireless, very lightweight, very fast x-ray system, which uses a continuous wave (not pulsed) x-ray source for the best possible resolution. The FS30 has a large, thin panel, with a diagonal of 30 inches (614 mm x 460 mm); also available as the FS15, with a 15 inch diagonal screen. The FLATSCAN system is used by elite bomb squads and EOD teams around the world.

FOG-FSG Remote Firing Systems

FOG-FSG is a family of sophisticated radio-controlled initiation systems with new technology; it is the next generation of advanced initiation for explosive charges, pyrotechnics, etc. Full 2-way communication with comprehensive answer-back and can have Up to 4 (+4) or 8 (+8) receivers per transmitter, all managed remotely either individually and/or in groups. Extraordinary set of type-approvals for safety and reliability from national authorities (BAM-Germany; SUVA-Switzerland).
