Custom Kits

FFI TACTICAL offers a custom design and kitting service for everything from battlefield forensics kits, to mobile analytical laboratories, to hand tool kits, to complete EOD/Bomb Squad systems, to tactical equipment for special military and police units. Such systems can include training at the customer's location.

Example Kits:

- Custom, contraband search backpacks
- Custom, special forces EOD backpacks
- Food safety, chemical and biological, portable laboratory
- Battlefield forensics evidence collection backpacks
- Vehicle-based, forensics laboratories
- Turn-key, transportable forensics laboratories
- Custom personal protective equipment - ballistic & blast pressure
- Custom contraband search and chemical identification kits
- Kitted EOD & bomb squad vehicles
- Humanitarian de-mining and battlefield ROW clearance kits, PPE, metal detection, removal tools...
- Crime scene kits including tents, consumables, photography...

Field Forensics, Inc. (FFI), develops and manufactures forensics sampling and identification devices for law enforcement, homeland security, and military customers. FFI has fielded several product lines in field chemical extraction, explosives detection, narcotics identification and threat-chemical identification. FFI has materials and methods that are highly-evolved but simple to use in very tough environments. FFI TACTICAL, a division of Field Forensics, Inc. delivers systems, tools, and technology to EOD, C-IED, UXO, De-mining and related applications. FFI has gathered world-class, unique technologies from around the world and provides them in support of very difficult missions.

FFI Products & Services

- Explosives Detection - ELITE™ & ULTRA™ detection kits
- Explosives Precursor Identification - IDEX™ series of chemical identifiers
- Narcotics Identification - DABIT™ narcotics detection & identification kits
- Raman Spectroscopy - HandyRam II™ handheld chemical identifier
- Fentanyl & Heroin Detection - DXC.001, trace detection and identification of heroin & fentanyl

FFI TACTICAL Products & Services

in addition to kitting services, FFI TACTICAL is distributor of the following type equipment:

- Personal Protective Equipment - bomb suits, search suits, de-mining helmets & aprons, bomb blankets
- Detonator & Munitions Carriers - single and multi-detonator carriers for EOD and SWAT
- Portable X-Ray - Teledyne ICM Constant Potential (CP) Systems for C-IED and security applications
- Disruptors - Richmond/CSL Vulkan™, Viper™ and Mamba™ disruptor systems
- Metal Detection - systems for UXO search, de-mining, and security, including underwater systems
- EOD and SOF Search Kits - backpack tactical search tools for bomb squads, EOD and SF
- Water Abrasive Suspension - cutting systems for UXO, C-IED
- Made in USA handtools
