20LF HEPA Facepiece

Innovation at Work

Bullard innovates for the way you work. That's why we took our most popular hood design and added a HEPA exhalation panel that filters 99.97% of particulates. The 20LF HEPA facepiece is the only loose-fitting facepiece on the market with a built-in HEPA exhalation panel that protects not only the PAPR wearer but the environment and product.

Key Features:

• Built-in soft suspension

• 25 APF (Assigned Protection Factor)

• No fit testing required

• Wide angle lens for increased visibility

• Filters 99.97% of particulates from exhaled air

• Chemical, water, and moisture resistant

• Constructed of DuPont™ Tychem® 2000

• Comfort fit in standard width (medium, large, extra-large) or contoured width (small, medium, large)

• Available with or without a HEPA exhalation panel
