# Holdfast De-Mining Visor & Helmet

Designed to International Mine Action Standards

---

## Demining Visor & Helmet (available separately or combined)

**VISOR** - The Demining Visor comes with an adjustable cradle for individual preference along with an interchangeable brow pad for comfort and hygiene. It comes standard with a unique ventilation slot, which provides a de-misting and ventilation feature much needed in some of the harsher environments where this equipment is used. The Demining Visor is designed to work in conjunction with the Holdfast Demining Apron, Supervisor Apron or Demining Vest.

**Materials:** Untreated 6mm Polycarbonate Visor with Cradle; Protective anti-scratch cover

**Protection Specification:** Manufactured to meet IMAS 10.30; V50 – 250m/s

**Weight:** 1.25kg **Colors:** N/A

**HELMET** - The Demining Helmet is an innovative demining helmet concept. The helmet is made from light composite materials and incorporates multiple air circulation vents around the crown of the head to prevent heat exhaustion. The HAL Helmet also comes with our unique Flip-up and Lock Down visor system.

**Materials:** Visor (as above); Shell – GRP; Suspension – Nylon webbing

**Protection Specification:** Manufactured to meet IMAS 10.30; V50 – 250m/s

**Weight:** 1.6kg **Colors:** Customer specification (Shown here in tan)
